

Individual Contribution

Jordi Polo - 239980 - u187192

1. Out of 100, what percentage of the project do you think you contributed to?

I think I contributed in the 50% of the project

2. Describe your individual contribution to the project (max 1/2 page).

We have been a group of two after one of our members decided to take only the continuous evaluation and not do the project, making it a little bit harder for us to do the project. Even so, I think we have distributed the work in an even way, and with good coordination.

The project has been divided in two halves, one more theoretical and the other one more practical. We divided the project in a half way, where I took the lead in the theoric part doing from the point 1 to the point 5 included, and contributing too in the creation of the assets of crypto croakers. I did an extensive research through articles and technical papers, to explain the story, popularity, art and the technical parts of NFTs, making reference to all the information I got. Starting with the abstract part, continuing with the introduction and our contribution part, and finalizing with the related work and background, terminology and definitions part in which I explain the technical aspects of NFTs and blockchain, where Simon contributed too in the part 5, giving some terminologies that he thought that were relevant.
